SPOTICA

makes Security & Privacy simple… *amazingly simple*

Simply Click-and-Drag to Create and Maintain a full Information Security and Privacy Management System.

Solution **Overview**

A minimalistic and integrated cloud-based solution that provides step-by step advisories to guide executives, managers, and technical specialists in carrying out their respective duties towards information security and data privacy

Solution **Advantages**

- Clear understanding of what to do for Information Security & Data Privacy
- Practical value-add, not just another tick-box exercise

What makes **Spotica Different?**

Advisories

Spotica is not just a system of record but an Advisory system.

It is effectively a “CISO in a box”. It applies its knowledge engine through an intuitive interface to guide every user on what to do next, every step of the way.

Business Language

Spotica translates the complex standards and tailors the language it uses to the various roles within the organization, ensuring that it is practical and suited to the audience whether executive, management, or technical specialist.

Knowledge Engine

Spotica creates holistic insights at every decision point. The Knowledge engine applies the embedded Specialist Security & Privacy knowledge to keep itself up to date by aggregating the data from across the platform to create valuable data insights that provide new and updated advisories.

It is like having a team of seasoned professionals working around the clock to have the latest advice and insights at your fingertips, all of the time.

SPOTICA

WHY Spotica

The Spotica Value Proposition

Management can quickly adjust the Security and Privacy strategy based on dynamic business intelligence with Holistic views.

Identify weaknesses and receive advice into your:

- Information Security & Ransomware protection,
- Data privacy program

Spotica's unique design provides unparalleled time to implement as well as:

- Consolidated, real-time Audit and Risk Committee support with
- out-of-the-box Risk Register, Policies, Audit Reports, and more…

Your aide towards privacy compliance and/or ISO certification

Facing these challenges?

- You need to be Privacy Compliant (aka ISO 27 701) but not sure where to start.
- Digital Transformation is adding vulnerabilities faster than the ability to implement security protection.
- Manual and Cumbersome reporting for the Audit and Risk committees
- Challenge in aligning the information security and/or privacy agenda across the IT domains.
- Scarce availability and cost of Security skilled specialists.
- Too many complex security frameworks and standards to make sense of.
- You're planning to implement ISO 27001, or you have implemented ISO 27001 and it is a nightmare to maintain

The Spotica Solution

Spotica is unlike other rudimentary systems of record, it is one of the only holistic IT management systems that offer integrated step-by-step advisories.

The Advisories in Spotica's digital CISO module is based on:

- ISO 27001 – Information Security Mgt
- ISO 27701 – Privacy Information Mgt
- OCTAVE – Risk Mgt
- SCF – Control Framework
- As well as other standards,

which enable you to manage risks proactively while setting you on the path towards ISO certification.

The Innovative solution lies in the Advanced Knowledge Engine (back-end machine learning) which smartly utilizes these standards to create a solution that is also Insurance backed by best-of-breed insurance products.

With Spotica you can apply for a unique Cyber insurance product from one of our partner's (embedded using the Spotica Assessment) giving you the added benefit of:

- Legal Support
- Marketing Support
- IT Recovery Support

for peace of mind while you're still busy implementing the desired level of controls to mitigate a breach.

Simple and intuitive in design. Spotica.
